

KneeMate Kneeling Pads

KneeMate Rubber Kneeling Pads are portable anti-fatigue floor mats designed for tasks requiring frequent movement, repetitive motions and kneeling on hard unforgiving surfaces. Mats feature a nitrile rubber base, multiple sizes and a closed-cell design. These kneeling pads are non-absorbent and clean up with soap and water.

The closed-cell design keeps the kneeling pads from absorbing water or other liquids, and they are resistant to most industrial, automotive, home and gardening chemicals. The dense nitrile rubber base protects your knees from hard or uneven surfaces, while the foam comfort layer gently cushions and supports your knees for ultimate comfort.

Kneeling pads are available in several configurations. Two sizes include 12" x 22" and 18" x 30". Two thicknesses include 3/4" and 7/8". Logo versions are available with no art fee – call for pricing.

- Non-absorbing and chemical resistant
- Mats feature a built-in carrying handle
- NFSI "high traction" certified

Item No: FM.FPK
