

Wood Chair Floor Mats

Our Wood Chair Mats are made for both **carpeted floor surfaces AND hard surfaces** (such as tile, marble and wood).

- The rubberized backing helps prevent mat movement on any type of floor, while the 5/16" thickness allows for a sturdy, smooth rolling surface.

All wooden chair mats come with straight edges around the perimeter of the mat.

A "**lip**" is defined as an extension or "tongue" from one of the two longer sides of the mat. The lip protects the floor underneath the desk where the chair may roll if scooted all the way in. The picture to the right has a lip.

NOTE: All chair mats with a lip are listed using the **overall size** of the mat including the lip. Therefore, the rectangular "base" portion of the mat is smaller than the overall size listed.
