

Circular Disk Garage Flooring

Spruce up your garage floor with Circular Disk Garage Flooring. These garage floor mats have a coin top surface, which adds traction to an otherwise slippery garage floor.

These coin top garage floor mats are made for use as heavy-duty vinyl flooring and thus geared to withstand constant car and truck traffic.

Disk top garage flooring is available in two thicknesses: 75 Mil (Commercial Grade) and 85 Mil (Industrial Grade).

Coin top garage floor mat rolls are quite easy to install: simply unroll the mat and you're done. These garage mats can butt together to make larger mats and can also be cut to fit any layout.

Circular disk garage flooring not only visually enhances the garage floor but also helps to hide imperfections in the floor such as cracks and stains. Furthermore, these garage floor mats help protect floors from the eroding effects of snow, salts, oils, greases and lubricants.

This roll out garage flooring increases traction, especially on slippery, wet garage floors while preventing dirt and debris from being brought inside.

Item # FM.GFCDGF
