

## ComfortEase Anti Fatigue Mats

ComfortEase Anti Fatigue Mats are a durable and comfortable solution for areas needing a long-lasting and comfortable anti-fatigue floor mat. Available in several standard sizes as well as long continuous runs.

The offset bubble design of these floor mats incorporates flexible rubber bubbles on both the top and bottom surface which allow a greater range of joint motion, decreasing fatigue. The rounded comfort bubbles also make pivoting and turning easier, further decreasing stress on joints during repetitive motions.

An integral beveled safety edge eliminates tripping hazards while providing an easy transition from the floor to the upper surface of these 3/8" thick industrial comfort floor mats.

An ideal anti-fatigue mat for use in dry locations such as packing areas, shipping stations, order filling stations and manufacturing equipment operator control areas.

- Mats are Solid rubber, long lasting, durable
- Offset bubble design for flexibility and comfort
- Medium duty mats for use in dry locations
- Rounded bubbles facilitate turning and pivoting
- Integral bevel on all four sides of the mats prevent tripping
- Floor mats are 3/8" overall thickness
