

Commercial Kitchen Mats

Commercial Kitchen Mats are designed for restaurant and commercial kitchen environments where comfort, traction and drainage are all a priority.

These kitchen mats are constructed out of Nitrile rubber and thus hold up better to grease, fat and oil. The black kitchen mats are grease resistant for occasional spills, while our red kitchen mats are grease proof.

Both kitchen mats have drain holes to allow food and liquids to fall through, leaving the textured, top surface with greater traction to prevent slippage.

The beveled edges are found on each side of the floor mat and help prevent tripping when stepping on and off these commercial kitchen mats.

The all-rubber construction gives these rubber drainage mats greater compressibility, making them more comfortable to stand on all day.

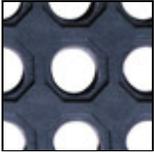

These 1/2" thick Commercial Kitchen Mats are light-weight, which allow for easier handling and cleaning.
