Rubber Drainage Anti Fatigue Mats

Rubber Drainage Rubber Mats are constructed of a commercial-grade rubber, which has become the go-to anti-fatigue mat for wet areas due to its non-porous construction and large drainage holes, which allow liquids to fall down through the mat and leave the surface dry.

Rubber Drainage anti-fatigue floor mats are used in restaurant kitchens and industrial manufacturing plants alike due to their durability and simple design.

Optional beveled safety edging is available for these anti-fatigue mats in OSHA approved black, safety yellow and orange colors.

Larger anti fatigue mats can be formed by connecting individual mats together with fatigue mat connector clips. These 7/8" thick floor mats can thus tightly lock together yet still easily roll up for maintenance or cleaning.

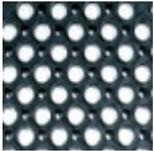

Please call for more information regarding custom size pricing for Rubber Drainage Anti Fatigue Mats.

Item No: FM.FWO
